Oracle SQL & PL/SQL

PL/SQL program unit. The main feature of SQL (non-procedural) is also a drawback of SQL: one cannot use control statements (decision-making or iterative control) if only SQL is to be used. PL/SQL is basically a procedural language, which provides the functionality of decision making, iteration and many more features like other procedural programming languages.

PL/SQL - Wikipedia

Purpose. Use a SELECT statement or subquery to retrieve data from one or more tables, object tables, views, object views, or materialized views.. If part or all of the result of a SELECT statement is equivalent to an existing materialized view, then Oracle Database may use the materialized view in place of one or more tables specified in the SELECT statement.

SELECT - Oracle

The following Tip is from the outstanding book "Oracle PL/SQL Tuning: Expert Secrets for High Performance Programming" by Dr. Tim Hall, Oracle ACE of the year, 2006: When an SQL statement is passed to Oracle, the cost based optimizer (CBO) uses database statistics to create an execution plan which it uses to retrieve the data in the most efficient matter.
