

### **Visual Studio Multiple Solutions One**

No, you can't run multiple instances of your application from Visual Studio. Features like "Edit and Continue", for example, can only work if there's a single instance.

### **Run multiple instances with one click in Visual Studio ...**

This is the way Visual Studio is designed: One solution, one Visual Studio (VS) instance. Besides switching between solutions in one VS instance, you can also open another VS instance and open your other solution with that one.

### **View more than one project/solution in Visual Studio ...**

Visual Studio includes a debugger that works both as a source-level debugger and as a machine-level debugger. It works with both managed code as well as native code and can be used for debugging applications written in any language supported by Visual Studio. In addition, it can also attach to running processes, monitor, and debug those processes. If source code for the running process is ...

I was asked to import data to SQL from multiple (15) Excel files, and each Excel file contained historical data with more than 200,000 rows. I could do it with 15 data flows and Excel connections in SSIS, but I didn't want to do it that way because I wanted to find a more efficient way than creating 15 data flows and Excel connections. I'm too lazy to create all those data flows and Excel ...

Introduction In this chapter, we will work with Visual Studio to connect to SQL Databases in Azure. The first part of this chapter will be to create a Database in the Azure Portal and the second part will be to connect in Visual Studio and create some Database Objects. Requirements An Azure subscription. A local [...]

### **Working with Visual Studio and SQL Azure databases**

Microsoft codenames are given by Microsoft to products it has in development, before these products are given the names by which they appear on store shelves. Many of these products (new versions of Windows in particular) are of major significance to the IT community, and so the terms are often widely used in discussions prior to the official release. . Microsoft usually does not announce a ...
